

## Cleaning & Care of cabinet

- **The Astron Eng Fish Serve Over's should be emptied of ice each day and washed down. They are all fitted with sparge pipes to facilitate this.**
- **Care must be taken to ensure the filter grills over drains are kept clean at all times but particularly during washed down to avoid blocking with food particles.**
- **A deep clean should be completed once a week.**

## DETAILED CLEANING INSTRUCTIONS

1: Use wash down pipe to begin wash down and melting of ice (after the cabinet has been emptied of product)

2: Ensure the Drain Grills don't become blocked during wash down. If they block with debris this will lead to water leaking over cabinet.

3: After wash down remove the drain grills (ensuring no debris goes down shop drain) with the handles as shown.

4: Thoroughly clean the grills before replacing.
